T1 Electric

100% Electric. Perfectly restored.

We build fully restored Volkswagen T1 buses as all-electric vehicles.
The T1 combines timeless design with sustainable technology and is ideally suited for use as a promotional or event vehicle.

Distinctive and appealing design

The VW T1 is a cult icon that evokes emotions in almost everyone who sees it.

Its retro look, combined with state-of-the-art electric technology, attracts maximum attention - ideal for branding and advertising.

Sustainable image

This electric VW T1 stands for environmental awareness and innovation.

Companies using it as an advertising vehicle can highlight their environmental responsibility and position themselves as pioneers of sustainable mobility.

Low noise, zero emissions and flexible use

Emission-free driving enables use in urban areas, pedestrian zones or at city-centre events - places where conventional vehicles often face restrictions.

The quiet electric drive enhances comfort and creates a positive impression.

Low maintenance and easy operation

The electric drive offers intuitive, straightforward handling, even for inexperienced drivers.

Less maintenance thanks to fewer mechanical components than combustion engines: no oil changes, fewer wearing parts and simpler technical servicing.

New parts guarantee a worry-free service life.

Adaptability

The VW T1 can be tailored to the needs of the advertiser. Body styles: panel van for large advertising areas, bus for inviting branding, Samba for lifestyle themes.

Custom paintwork and branding: the perfect platform for eye-catching designs or logos.

Interior design: can be configured as a mobile exhibition platform, sales stand or lounge.

230 V outlets: power coffee machines, laptops, sound systems or even screens at trade fairs or events.

Economical operation

Low running costs thanks to the electric drive: lower energy costs compared with fossil fuels.

Reduced maintenance further lowers costs in the long term.

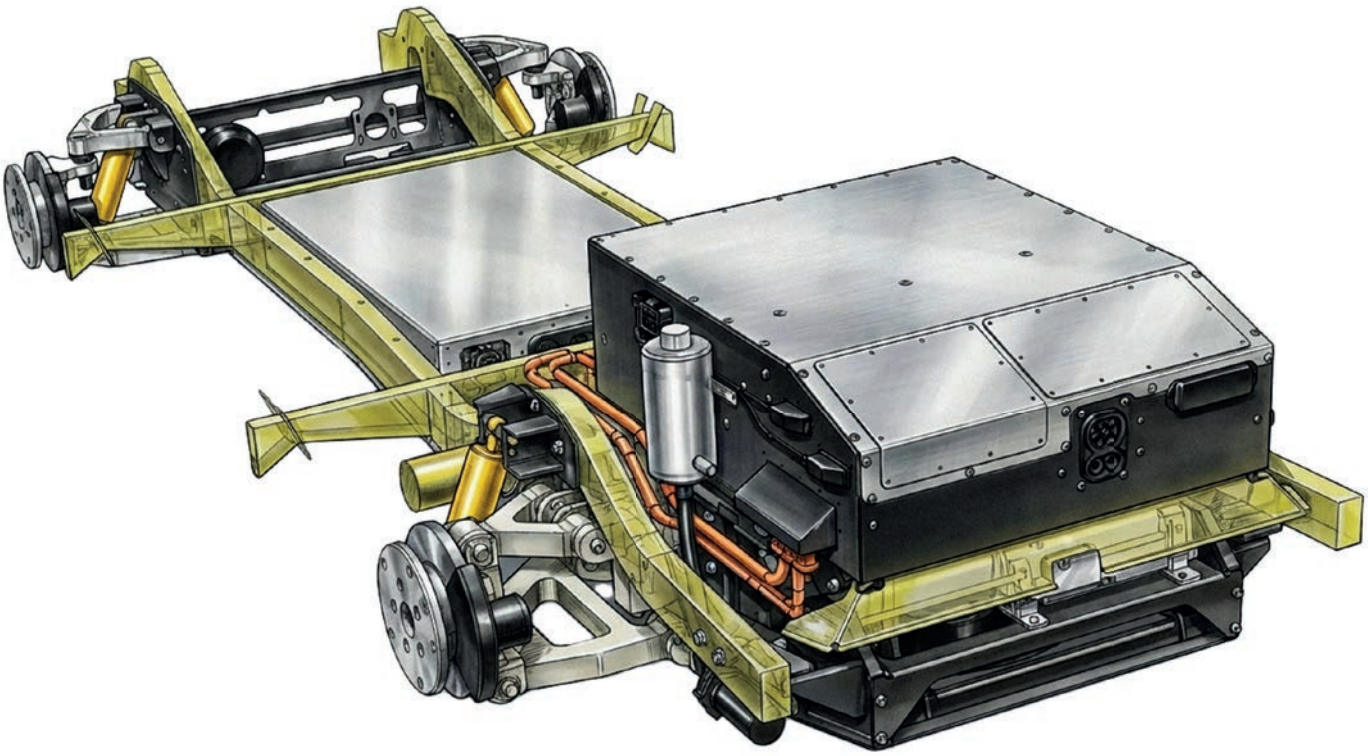

Versatility

Applications range from mobile exhibition stands and promotional or event vehicles to food trucks. The different body styles offer many possibilities.

Suitable for almost any industry, from sustainable fashion and catering to high-tech products.

Exclusivity

The electrified VW T1 is unique and stands out from other advertising vehicles. This exclusivity leaves a lasting impression on the target audience.

T1 Electric Specs

60 kW	Motor power
10 s	Acceleration (0-100 km/h)
130 km/h	Top speed
200 Nm	Torque
